Objective

.NET Developer with experience in ASP.NET Core, C#, and Entity Framework Core, building secure and scalable web applications. Experienced with SQL Server and RESTful APIs, with working knowledge of React.js, Flutter, HTML, CSS, and JavaScript.

Courses

- **Route Academy | ASP .NET Core Diploma** **April 2025– Aug 2025**
  - Completed **600+ hours** covering **C#** Fundamentals, Object Oriented Programming (**OOP**), **Solid Principles**, **Design Patterns**, **LINQ**, **Entity Framework Core**, **ASP.Net Core MVC** and **ASP.NET APIs**.

Technical Skills

- **Back-End**: C# | OOP | ASP.NET Core | MVC | Web API | JWT | Identity Framework | AutoMapper | SignalR | Hangfire.
- **Database & ORM**: SQL Server | LINQ | Entity Framework | EF Core | Dapper | Redis.
- **Architecture & Patterns**: Clean architecture | Layered architecture | CQRS | SOLID | Design patterns.
- **Core** : problem solving | Data structure | Algorithms | Agile | Design Principles
- **DevOps & Deployment**: Git | GitHub | GitHub Actions | CI/CD | Serilog.
- **Programing Languages**: C# | C++ | Java | python | JavaScript.
- **Soft Skills:** Problem Solving | Team Collaboration | Communication | Time Management.

Personal Projects

1.AirportManagementSystem==>GitHub

An Airport Management System that streamlines airport operations, including flight management, passenger services, and booking workflows. Built with ASP.NET Core, SQL Server, and Entity Framework Core following Clean Architecture principles.(80EndPoint)

2. E-Commerce==> GitHub

A modern E-Commerce backend API built with ASP.NET Core, following Clean Architecture and SOLID principles, with JWT authentication, role-based authorization, and CRUD operations for products, orders, and users.(60EndPoint)

3.Employee management system(EMS)==>GitHub

A robust Employee Management System built with ASP.NET Core Web API to manage employees, departments, attendance, leave requests, and payroll efficiently. Designed using Clean Architecture, Entity Framework Core, and JWT Authentication for a secure and scalable backend.(85EndPoint)

4.Restaurant Management System (RMS)==>GitHub

A comprehensive Restaurant Management System built with ASP.NET Core Web API to manage tables, menus, orders, kitchen operations, inventory, and billing efficiently. Designed using Clean Architecture, Entity Framework Core, and secure authentication for a scalable and maintainable backend.(60EndPoint)

5.Hospital Management System (HMS)==>GitHub

A full-featured Hospital Management System developed using ASP.NET Core Web API, Entity Framework Core, and SQL Server to manage patients, doctors, appointments, medical records, prescriptions, and hospital workflows. Implemented with Clean Architecture, SOLID Principles, Repository Pattern, Unit of Work, JWT Authentication, Role-Based Authorization, AutoMapper, FluentValidation, and Global Exception Handling for a secure and scalable healthcare backend.(90 Endpoint)

Education

- **Bachelor's Degree** in Computer Science - Al-Shorouk Academy. **Oct 2022– 2026Jun**
- Graduation Project: Scored **200/200** (Full Mark).

Languages

- **Arabic** : Native
- **English** : Fluent
